

Turn a smartphone into a mobile time clock

Employee self-service on-the-go

Employees can easily punch in/out, including for lunches and breaks, view their timecard, view their schedule, request time off, transfer labor levels, and more.

Maintain control without the terminal

Restrict employees to schedules, start times and even overtime. Plus geo-locate employee punches and restrict timesheet entries to specific locations.

Let XT Mobile pay for itself

Avoid badges and terminals, plus reduce costly timesheet errors, buddy punching, restricted punches, and more. Let us show you how XT Mobile can easily pay for itself.
