

Simplex Time Recorders

Leaders in **TIME, ATTENDANCE & ACCESS CONTROL**

The STR23 is a reliable and affordable fingerprint device. This device also offers a built in RFID card/tag reader which allows for staff to be identified by either placing their finger on the sensor, or alternatively presenting their Proximity Card/Tag to the device, or both.

The device is supported by both our Standard Software package (*Fingerprint Attendance software*) for those with very basic time keeping requirements, as well as our more advanced software (*TimeLOG*) which will allow for payroll exporting and complete calculation of all hours worked.

Device Specifications -

- | | |
|--------------------------------|----------------------------------------------|
| • Capability | Time & Attendance & Access Control |
| • Identification Mode | Fingerprint, Proximity Card/Tag, or Password |
| • Fingerprint Algorithm | BioTH2.0 |
| • Response Time | Less than 1 second |
| • False Acceptance Rate | Less than 0.01% |
| • Communication Method | TCP/IP, USB, Wi-Fi |
| • Bell | Can ring a siren |
| • Doors | Can release/trigger locks |
| • Fingerprint Capacity | 3000 templates |
| • Record Capacity | 200 000 records |
| • Working Humidity | 20%-80% |
| • Working Temperature | 0-45 degree |
| • Power | 9V DC |
