

Fingerprint Access Control STG-iColor8

Features:

1. New version algorithms with dependability and accuracy, identification speed improved, process 3000 fingerprints, no matter good or poor, with less than 1 second.
2. Build-in embedded standalone modules with big capacity FLASH, it is easy to integrate with various systems.
3. Alarm clock function for giving the correct time for On and Off.
4. Build-in USB, Weigand out and Ethernet ports.

Specification

User Capacity: 3000

Transaction Storage: 80000

Period of data: Keep data for 3 years.

Verification Mode: 1:1,1:N

LCD: 2.8 inches TFT color screen

FAR: <0.0001

FRR: <0.01%

Verification Speed: Less than 1 second

Alarm Clock: Build-in alarm clock

Alarm Function: Anti-demolition, Door not close after opening, Force to open the door

Communication: TCP/IP, USB, Weigand Output

WG Input/output: WG26、WG34

Show: Time, ID, Name

Language: English, French, Spanish, Indonesian, Turkish etc

Working Mode: Time Attendance, Standalone, can work persistently

Temperature & Humidity: 0-45 degree, 20%-80%

Machine Size: 195*118*43mm

Option: Proximity/RFID Card reader

Application: Office/factory/bank/hotel/school etc
